GORIZIANE

Innovating Together

MAINTENANCE, REPAIR, OVERHAUL

The Maintenance, Repair, Overhaul Department is made up of a team of skilled technicians and engineers who offer reliable services in the MRO field.

Goriziane has been working in the Defence field for many years continuing to invest in Research & Development to improve its knowledge and know-how, thus to provide customers with vehicles more and more efficient.

MAINTENANCE

Maintenance of military vehicles, both track-and wheel-light and heavy based, is one of the historical missions of Goriziane: the care and the attention for the details are the hallmarks of Goriziane.

REPAIR

Thanks to the deep expertise of our engineers and technicians, any machine breakdown can easily be pinpointed, thus machines can be repaired and restored in a very short time.

OVERHAUL

The LEOPARD is one of the most succesful and best-selling tanks in the history of the military vehicles: Goriziane continues to carry on the overhaul program of this track-based vehicle, bringing it back to a new life and right on this tank we put in place a general overhaul.

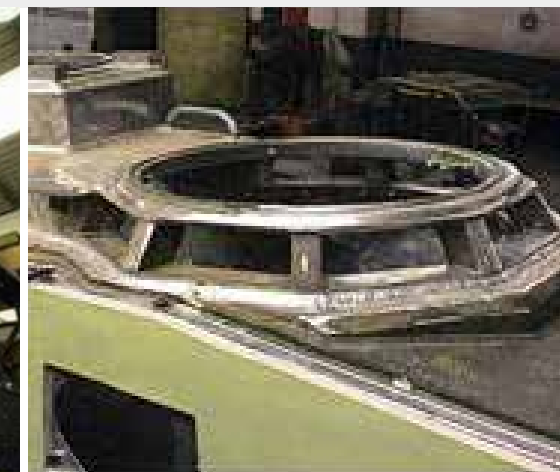

Goriziane depot facility has the capacity and capability to overhaul/ remanufacture large range of combat and tactical vehicles, hull upgrading /modification and repair heavy and light vehicles. Towed and self propelled artillery.

Unique responsible for entire overhaul process cycle, no subcontractors. We inspect, repair, overhaul and test on bench: engines, transmissions, gear boxes, junction boxes, hydraulics parts and fire extinguisher systems.

UPGRADE

In 2001 Goriziane won the tender for the upgrade of 34 LVTP7, owned by the Italian Navy and Army, to the AAV7 RAM/RS version, the same one of the U.S. Marines. The success of the operation made the name of Goriziane arise worldwide and nowadays the Company is a landmark as a Vehicle Upgrader.

Engine Dept.

Thanks to the Technical Staff and to the over 60 years of experience, Goriziane has gathered a know-how and a way of proceeding for engine maintenance, overhaul and refurbishment that are unique in the world.

Trasmissions Dept.

To understand a motor it is necessary to understand its transmission. Goriziane has its own department dedicated to transmissions, using the most advanced technologies. Goriziane is currently licensed for both Allison and ZF, 2 of the major transmission manufacturers.

Welding Dept.

Welding and carpentry are located inside the main hall, a rectangular area of 17.00 m. x 80.00 m. with a total area of nearly 1400 square meters. The maximum height of the building is 6.7 m. Inside the shed are obtained: the hot chamber for testing of welding (WPS, WPQR, WAC, PQR.)

Painting Dept.

The Goriziane plant is provided of two heater chambers dedicated to the Painting phase: the high volume of the chambers allows the painting and the subsequent drying of four heavy tanks of the same time.

Test Bench Dept.

Goriziane can test any type of engine up to 2,000 horse power and provide complete documentation.

Hydraulics Dept.

With a department dedicated entirely to the maintenance of hydraulic systems and thanks to the latest technology and experience inherited from the past, Goriziane is a leader in the repair and maintenance of any hydraulic systems of track-and wheel-based vehicles.

Washing Dept.

Washing department is an area not to be underestimated. Goriziane has a department dedicated to this activity. In addition to the normal systems there is a considerable pickling tank in which it is possible to plunge an entire hull tank.

Warehouse.

Our secured warehouse covers more than 2,000 square meters, it is divided in 3 storage areas plus a trust warehouse.

AREA & TEST AREA

Goriziane is located in 150,000 sqm, 35,000 sqm covered in a strategic position.

Airports: 10 Km to Trieste, 80 Km to Venice, 80 Km to Ljubljana.
Seaports: 15 Km to Monfalcone, 40 Km to Trieste, 110 Km to Venice.
Villesse is included in the European railway passage n°5.

With a Test Area ground of 50,000 sqm and two test lakes, Goriziane can perform any kind of hard testing, even for amphibious vehicles.

PARTNERSHIP

Goriziane is official partner of Iveco Defence Vehicles since 2006. This strong collaboration has led to the establishment of a framework agreement for the maintenance of armoured vehicles. General Dynamics Land Systems selected Goriziane as excellence centre for European Force Protection Vehicles.

Goriziane is authorized by BAE Systems to repair, maintain, upgrade and support to the Italian fleet of AAV7 A1 RAM/RS. This is a good and a very effective business for all the parties involved: BAE Systems, Goriziane and the final user. Efficiency of vehicles 100%. Goriziane signed a support agreement with BAE Systems Hägglunds that enables Goriziane to become the only appointed partner to provide support and services to the Italian fleet of Bv206 and Bv206S: this new agreement is consecutive to initial Memorandum of Agreement signed in 2013.

CLEVER SOLUTION

It is the result of the collaboration between Goriziane and Alfa Laval. The system provides an efficient, robust and compact solution for the purification of large quantities of diesel fuel.
